

# WATER CONSERVATION

The average American uses about 100 gallons of water a day. Simple steps in your daily life can help reduce your water use by up to 25% and save you money on your bill! Read on for ways to help prevent water shortages in your community and save water.

## 5 WAYS TO SAVE WATER

IN  
YOUR  
HOME

Check your pipes and fixtures for leaks. If your toilet is running all the time that's money down the drain!

Do one fewer load of wash a week. Wear clothes twice if they aren't dirty!

Turn off the faucet when you are brushing your teeth, and don't let it run unnecessarily.

Use a dishwasher. They use less water than handwashing! Only run a load when the dishwasher is full to save water.

Limit showers to 5 minutes or less.
